State also the number of shares that may be issued on conversion of all the outstanding convertibles, as well as the number of shares held as treasury shares, if any, against the total number of shares excluding treasury shares of the issuer, as at the end of the current financial period reported on and as at the end of the corresponding period of the immediately preceding financial year.**

US$100.0 MILLION 5% CONVERTIBLE BONDS DUE IN 2014

As announced via SGXNET on 16 October 2009, Swiber Holdings Limited (the **"Company"**) had on 16 October 2009 issued US$100.0 million 5% convertible bonds due in 2014 (the "**Convertible Bonds" or "Convertible Loan Notes")**. Key feature of the Convertible Bonds is as follow:

*"The Convertible Bonds may be converted at the option of bondholders at any time on and from November 26, 2009 to October 6, 2014, at the current conversion price of S$1.14, into fully paid-up ordinary shares of the Company at the fixed exchange rate of US$1.00 = S$1.44. The conversion price will be reset on each interest payment date (the "**Reset Date**") based on the average market price, defined as the Volume Weighted Average Price of shares for up to 20 consecutive trading days ("**VWAP**") immediately preceding the relevant Reset Date."*

Due to the reset feature on conversion price, the Company does not deliver fixed amount of equity for a fixed number of bonds based on the prevailing conversion rate. Therefore, it will not be able to determine the aggregate number of shares that may be issued on conversion of all the outstanding convertibles as at the end of current financial period reported on.

On 16 April 2011, the conversion price has been reset downwards to the VWAP of S$0.864[1] (being the floor price).

For the purpose of illustration, assuming that all the Convertible Bonds are converted at current conversion price of S$0.864, the aggregate number of shares that may be issued on conversion would be approximately 166,666,666. This represents approximately 32.98% of the Company's existing share capital of 505,355,000 shares (net of treasury shares).

This was offset by the redemption of series 1 and 2 in third quarter 2010 and series 3 and series 4 in first quarter 2011.
